PAVER PROJECT UPDATE

The pavers replacement project at the Belcher Road Gate is nearing 50% completion. The North side of the entrance is expected to be finished by this weekend. The remaining two steps, color washing the curbs and gutters and sealing the pavers, is dependent upon the weather but we are projecting completion of those steps between now and Saturday. Presuming the schedule holds:

- On Monday July 28th the barricades will be changed and all traffic entering at the front gate will be narrowed to one lane on the North side which is the normal resident's side of the entrance.
- **Traffic exiting the community at the front gate will be required to pass under the covered lane in order to reach Belcher Road. Therefore, any vehicle over six (6) feet in height will not be able to use the front gate as a means to leave the property.**
- **The West (back) gate exit is set to allow any vehicle to pass, no barcode required throughout the duration of the project.**
- **All trucks, landscapers, vendors, delivery vehicles will be directed to the back gate to exit the property. We encourage all residents to use the back gates as much as possible to minimize congestion.**

**PLEASE USE CAUTION WHEN DRIVING IN THE
CONSTRUCTION ZONES AT THE FRONT GATE**
